STAR TRONIC SOS

The STAR TRONIC SOS motor combines the features of the STAR TRONIC BIDI and TRONIC SOS ranges to offer an advanced and versatile solution. Equipped with a mechanical limit switch with progressive adjustment by rod and a two-way radio receiver at 433.92 MHz, it allows precise and safe wireless control. In addition, it includes a rescue control function, making it the ideal choice for applications in shutters that require both reliable automation and manual operation in emergency situations.
